LIST OF TABLES

Table 1 Dimensions vs Cutoff frequency variation9

1. INTRODUCTION

This section should be devoted to describe related scientific studies (scientific papers, reports, books etc.) which has been published in the literature.

1.1. Sample Subsection

The general description of the project and connections of the literature should be mentioned in this section.

2. PROBLEM DEFINITON

The detailed project statement has to be explained in this section.

Equations should be written with an editor e.g. Mathtyp. Formulations cannot be inserted as picture format.

Formulas should be written centered with the equation number, e.g.

$$\nabla \times \vec{E} = \frac{-\partial \vec{B}}{\partial t} \qquad (1)$$

Figures and Tables should be also centered and have separate captions, and numbers which are listed in List of Figures and List of Tables, respectively.

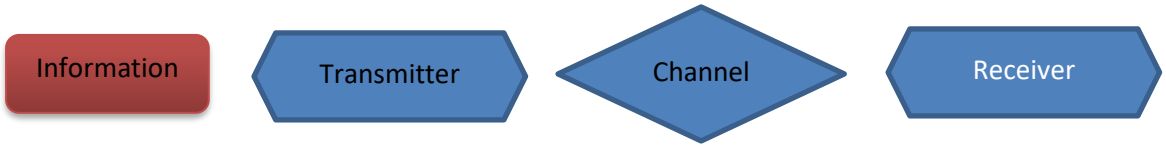

Figure 1 Block Diagram

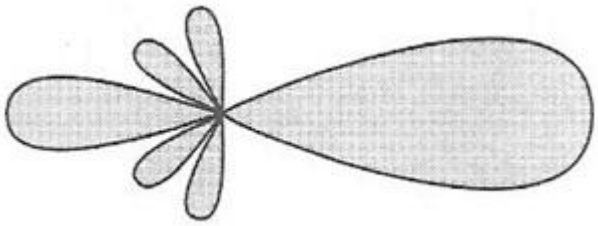

Figure 2 Radiation Pattern

2.1. Sample Subsection for Chapter-2

……

……

2.2. Sample Subsection for Chapter-2

……

3. PROPOSED SOLUTION

The method which will be used in the project studies should be clarified in this section.

3.1. Sample Subsection for Chapter-3

…….

4. RESULTS AND DISCUSSIONS

Results obtained during the project study should be presented in this section. Discussions on the scientific findings should be reported in a clear form.

Waveguide Type	width (cm)	height(cm)	Cuttoff frequency of TE_{11} (GHz)
WG-1	1	1	21.213
WG-2	2	1	16.770
WG-3	3	1	15.811
WG-4	4	1	15.461

Table 1 Dimensions vs Cutoff frequency variation

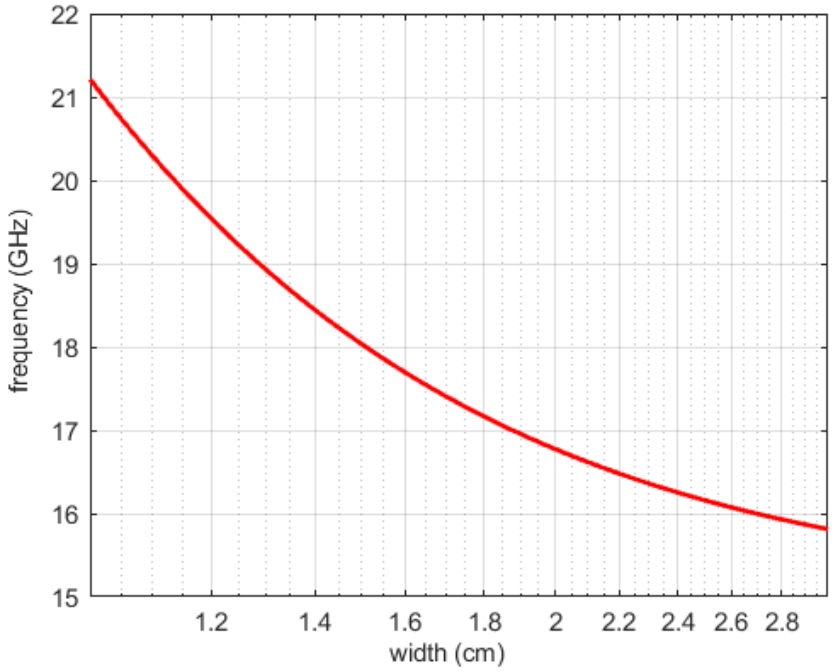

Figure 3 Width of the waveguide vs. frequency variation

5. CONCLUSIONS

General description of the project, the most interesting contributions and observations, and possible extensions should be emphasized in here.
